DETAILED ACTION

Terminal Disclaimer

The terminal disclaimer filed on 2/9/05 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of U.S. Patent No. 6,697,738 has been reviewed and is accepted. The terminal disclaimer has been recorded.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Abstract, line 2, "comprising" has been deleted.

Specification, paragraph [0001], line 2, replace "22, 2002" with -22, 2002 (now U.S. Patent No. 6,697,738)-.

Allowable Subject Matter

Claims 1-34 are allowed.

Claims 1-34 are allowable over the prior art of record, none of the prior art whether together singularly or in combination to teach the claimed combination as recited. The closest reference "Cement for Long term Isolation- Design Optimization by Computer Modelling and Prediction", Lullo et al., does not teach or suggest the improvement of the instant application comprising determining/evaluating a total maximum stress state of rock in the subterranean zone penetrated by a well bore for a cement composition associated with the introduction of the

cement composition setting into the well bore and thus determining whether the cementing composition is effective for the intended use instead Lullo et al. teach calculating changes in the stress components in cement due to changes in well bore temperature to minimize rig time and hence the well cost to speed up cement setting and bonding.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
